SUMMARY

Software Developer with 7 years of experience. I work primarily with **NextJs** and **NodeJs**. I specialise in **OpenAI API**, **AI integration**, and secure AuthN/AuthZ workflows. I also bring hands-on experience with **Git CI/CD**, **Docker**, and **deployment workflows** to support reliable delivery and maintainable production systems.

TECHNICAL SKILLS

- **Frontend:** JavaScript/TypeScript, NextJS, HTML, CSS, React Native, ReactJs
- **Backend / APIs:** NodeJs/Express, PHP, Elixir/Phoenix, GraphQL, REST APIs
- **AI-Assisted Development:** GitHub Copilot, CodeRabbit, Cursor, OpenAI, AI training (RAG)
- **Tools / Delivery:** GitHub, CI/CD pipelines, Docker containers, Kubernetes container orchestration, AWS (Lambda, S3, IAM)
- **Databases:** MongoDB, PostgreSQL, MySQL

PROFESSIONAL EXPERIENCES

Software Developer - CorporateInteractive - Australia | Mar 2024 - Jan 2026

Tech stack: NextJs, React+Ts, GitHub Copilot, CodeRabbit, GraphQL, React-Native, NodeJs, AWS S3

- Built and improved **QuoteCloud**, a production document editor/quoting platform.
- Key achievements
 - Delivered **core features from the ground up**.
 - **AI features** (Itinerary text and AI coworker)
 - **Security features:** **View Mode access control** for **password-protected document** feature and access control. Built **mandatory e-signature** for document acceptance
 - Shipped a Integrated the **Canva Editor (Image editor)** into QuoteCloud

Developer / Systems Analyst - Yondu Inc. - Philippines | Jun 2021 – Feb 2022

- Used **pytest (Python)** to run automated tests for backend
- Worked with SOAP APIs, including request/response handling, payload validation, and integration testing
- Assisted in maintaining **AWS IAM**, **AWS Lambda**, used for backend processing and event-driven tasks
- Supported enterprise system configuration and technical delivery across multiple projects
- Translate business and functional requirements into implemented system solutions
- Assisted with deployment, validation, and test execution to support stable releases

Software Engineer — Pragtechnologies, Philippines | Aug 2019 – Jun 2021

Tech stack: Elixir + Phoenix, GraphQL, React-Native, React, Javascript, PostgreSQL

- Built and maintained SeeYouDoc (Telemedicine platform)
- Delivered end-to-end work across frontend and backend. Used **Elixir/Phoenix** for the business logic and services and **React/React Native** for building the UI.
- Practiced test-driven development to deliver accurate features.
- Implemented **GraphQL APIs** and integrated them with React Native mobile app.

Software Developer — Bounty Fresh Food Inc., Philippines | Feb 2019 – Jul 2019

Tech stack: PHP + CodeIgniter, Javascript, MySQLServer, SSRS

- Supported system design and architecture with managers and translating business flow to implementable requirements.
- Partnered with QA and Product to deliver stable releases, improving reliability through structured testing and issue resolution.
- Developed a **Feed Monitoring System** and **SSRS reporting** for tracking feed availability.

Systems Implementation Specialist — HDI System Technology | Jul 2018 – Feb 2019

- Supported system implementation activities, including setup, rollout support, and coordination to ensure smooth adoption for stakeholders.
- Work closely with developers to validate databases during rollout.

SEO Link Builder — Optimind Technology Solutions | Jul 2016 – Jun 2018

- Early career role focused on SEO link-building and off-page optimisation tasks, supporting search visibility and content discoverability.

Junior Systems Analyst — Asia Brewery Incorporated | Aug 2015 – Jun 2016

- Perform SQL queries and basic database analysis to validate data accuracy.
- Assisting system support, documentation and coordination across business and technical teams.

EDUCATION

Master of Information Technology | King's Own Institute, Australia, 2024 | **GPA: 4.50**

Tech stack: MongoDB, ReactJs, (NodeJS, Express), MySQL (edge/local device), and Node-RED

- Designed an automated holiday scheduling system to optimise HVAC (IoT) energy usage using Australian public holiday data
- **Academic Excellence**
- HVAC Holiday Scheduler - Integrate web app (MERN architecture)

Bachelor in Information Communications and Technology | San Beda University, Philippines, 2015
